The funeral of the late Mr John H Harney yesterday at Christ Church was very numerously attended. A grieficken people gave a strong attestation

the deeply-mourned. . The people began to assemble rapidly at Christ Church at II o clock, the appointed time for the commencement of the funeral services. The body of the deceased, however, had not arrived from his late home. The Masonic procession marched and pansed before the front of the church, where the fine band poured forth strains of sad music that sounded like the weird voices of the long ago. When the hearse with its waving black plames made its ap-

the minds of all a feeling akin to awe.

The mortal remains of the deceased were in a handsome coffin, upon which were two rich wreaths of dark evergreen and white camelias, emblematical of grief his spirit. The large Church was filled, and we have seldom seen so many griefstricken faces upon such an occasion. As we entered, a wailing chant was ascending from the choir, that fell sweetly bu wildly and mournfully upon the soul. We never before heard the beautiful, and grand burial services of the Enisconal Church so touching'y performed as the Rev. Mr. Craik performed them. In reading the prayers and St. Paul's sublime chapter on the Resurrection, his sonorou voice, which had the tremulousness of tears, seemed to thrill every heart and even the very air. The services closed and the solemn crowd took their way to the Cemetery and to their homes, chasten ed no doubt and made better by all they

had seen and heard and felt. Farewell, oh departed friend and broth Thou art gone, but thy spirit yet lingers on the earth, and its voice, deeper and clearer than even thy living tones breathes and burns upon the air.

Gen. Howard, of the Bureau, in De ember last, issued a circular letter, ordering, that, with a view to the reduction o the officers and agents of the Bureau, all ucky, Western Virginia, and Tennessee, with the exception of Superintendents of ucation, should be dispensed with, on and after the 15th of February, and their places taken by officers of the regular my to be designated by the Secretary of War, and to act as assistant commission-Certainly this order was a right and oper one, locking not only to efficiency service, but to economy, for the officers of the regular army must be paid, whether they perform the duties now performed oney paid to the officers dispensed with would be saved to the government.

But it seems that Gen. Howard's ndicions order was only a spasmodic affair. Only a month has passed since he sent it out, and he has already changed his mind. He tells the Senate that a large portion of the Congressmen from Tennessee and the delegations from Kenwas proposed, saying that it would work pinriously against the educational and other interests of the freedmen. We have no doubt that a large portion of the ontemptible radical Congressmen of ennessee have made such representa nean when he says that the delegations rom Kentneky and Maryland have peronally and in writing deprecated the bange? He cannot mean the Conessional delegations of these States, or most assuredly they have not deprecated the change "personally and in writing" Does anybody suppose that the Kentucky delegation in Congress have solicited Gen. Howard not to have the duties of the present officers of the Burcau done by regular army officers lest the interests of the negroes should suffer He can only mean private delegations, got up by Kentncky and Maryland radi cals under the influence of the Bureau officers themselves. And why should any inst interests suffer from the setting of regular military officers to do the work of the present quasi-military incumbentspersons taken from civil life and fitted up the former less intelligent than the latter? Have they less patriotism? Have they less energy? Have they less regard for

ssigned to them? Who believes it? A special Washington correspondent of be Cincinnati Gazette says that General Ioward has represented there that officia reports from Kentucky show, that, since he isening of the circular fixing Le time for closing the Bureau n that State, the number of out ages upon Union white men and freednen, as reported by good officers, has more than doubled. No doubt reports to this effect have been made to Howard by his Bureau officers in this State, out the reports were selfish, The people of Kentucky know, Bureau officers and all, that there has been no increase of ontrages on negroes r any other kind of ou'rages since the xing in December of the time for the butting of the Bureau. How could the esignation of the time operate in the naare of things to produce any such absure wished to persecute the freedmen, would they, on account of the specification of the period, and a very brief period, for the withdrawal of military protection from the latter, go at once to work to commit ontrages on them, instead of waiting for the period to expire? Would not the naming of the period by law, a period of only two months, have a directly contrary ef-

It is selfishness, low and base selfishness and nothing else, that prompts the Bureau officers to get up representations Washington that the interests of the negroes would suffer if regular army offi cers were to take charge of the Bureau affairs, and it is only selfishness of the lowest and most degraded kind that thus

Mr. Battle, Treasurer of the State North Carolina, was recently ordered y the State radical convention to pay the or diem of its members. He responded of their high regard for the departed and n an able communication, giving his reasons for declining obedience to the or der. The communication was referred to a committee instructed to hold a conference upon the subject with General Canby, he District Commander.

What will Canby do? He is reported be a conservative, and thus far. he has maintained the character of one pretty well. But Meade has ejected the Alabama I reasurer for his refusal to pay the Alabama convention, and, if his action is colerated, can the North Carolina Treasrer be kept in office after a similar regle stroke of the church bell, creating in fusal? Certainly such opposite rules of action in regard to a matter of so great importance should not be allowed in two istricts. If Canby suffers the North Carolina Treasurer to remain in office, either Canby or Meade should be removed by the President, for either the one or the ther must be ontrageously wrong.

But we are pretty well convinced tha he North Carolina Treasurer will have to go, and that Cauby will stay. The Presilent seems to have been generally very unfortunate in the appointment of both his first set and his second set of District Commanders. But two failures should not discourage him from making a third

FRANKFORT, KY., Jan. 27, 1565. We heard with regret this morning the news of the death of our friend John H. larney. He was a man much beloved by his friends, and those who were uot particularly on good terms with him, on account of difference of opinion on the political affairs of the country, could not but admire him as a man. At the time of his death he was holding the position of Public Printer of the State, to which he was elected at the last session, to hold his office until August next. It is now staguant, then, no matter how muc necessary that the Legislature should appoint some person instead of Col. Harney o fill the duties of the position until the expiration of the term. It is well known

that much printing will have to be done for the present session, and that arrangements had already been made by Col. Harney to do the work, at some consider able expense. Wi have nearly four times as much en as we had before the war, and yet are harder now than they were in that is to say, there is four times as currency actually issued, but there i our times as much currency in circultion. That is the trouble; and that lead ne to say to you that it is not the absolute mount of currency that has been issued n any country that makes money plenty or easy, but it is the activity of husiness money is plenty; but when business in money there is in the country, it remains unewployed, and money is tight, and the people suffer. We must, therefore, look to the cause of stagnation in business; upon any people, so far as we have any ac-

Now, my friends, let me prove that to you. In the last fiscal year the amount of taxes collected by the General Govern-ment exceeded \$500,000,000; that is, about twenty times as much as used to be collected under General Jackson. Five hundred millions are collected in taxes by the General Government alone. Her work takes the simple form of an ordinary journal of travel—no show about it whatever, except the simple show of fine natural feeling. In the green cloth dress of her book she enters familiarly into our houses. She takes us by the hand, she sits by our fireside, and she opens to us her heart. Hitherto when she has parleyed with her people as a whole it has been in stately speeches and formal proclamations. Now she lays aside her robes of state and enters into friendly converspeaks of the second of her chaplains: "October 29, 1454. "We went to kirk as usual at 12 o'clock The service was performed by the llev. Norman McLeod, of Glasgow, son of Dr. McLeod, and anything finer I never heard. The sermon, entirely extempore, was quite admirable; so simple, and yet so cloquent, and so beantifully argued and put. The text was from the account of the coming of Nicodemus to Christ by night; St. John, chapter 3. Mr. McLeod showed in the sermon how we all tried to please self, and live for that, and in so doing found no rest. Christ had come not were to live. The second prayer was very touching; his allusions to us were so sim-ple, saying, after his mention of ns, 'bless' their children.' It gave me a lump in my their children. It gave me a tump it my throat, as also when he prayed for 'the dying, the wounded, the widow, and the orphan.' Every one came back delighted; and how satisfactory it is to come back from church with such feelings! The servants and the Highlanders—all—were capually delighted! were most enjoyed, and the pleasure of them was most eagerly sought to be re-newed, on which the Queen and her party equally delighted.

She speaks with not less enjayment of another Scotch minister, whose sermon she commanded to be published:

"October 14, 1555. "To kirk at 12 o'clock. The Rev. J. Caird, one of the most celebrated preachers in Scotland, performed the service, and electrified all present by a most admirable and beautiful sermon, which lastof eyes looked hungrily enough. And since her Majesty is pleased to come to us in this way without ceremony, we venture to meet her as she would wish, without compliments. As critics we give an honest welcome to the distinguished ed nearly an hour, but which kept one's attention rievted. We drove back, and got out to visit old Mrs. Grant (Graut's mother), who is so tidy and clean, and to whou I gave a dress and handker-chief, and she said: 'Yon're too kind to me; you're over-kind to me; ye give me me; you're over-kind to me; ye give me more every year, and I get older every year. After talking some time with her, she said: I am happy to see ye looking so nice. She had tears in her eyes, and, speaking of Vicky's going, said: 'I'm very apeaking of vicky's going, said: I in very sorry, and I think she is sorry 'herself; and, having said she feared she would not see her (the Princess) again, said. She even became fond of the bagpipes:
"There were nine pipers at the castle:
sometimes one and sometimes three
played. They always played about breakand out; again before dinner, and during most of the dinner time. We hoth have become quite fond of the bagpipes."

She did not despise that national dish f which Dr. Johnson is well known to ave spoken of in most disrespectful 'At breakfast I tasted the oatmeal porridge, which I think very good, and also come of the 'Finnan haddies.''' But Her Majesty is profoundly silent as

her opinion of another national dainty. She says only this.

"At Monlinearn we tasted some of the Athole brose," which was brought to the

The people of Fdiphyrdy will be delight.

"The impression Elinburgh has made upon us is very great; it is quite beautiful, totally unlike anything I have seen; and what is even more, Alhert, who has seeu so much, says it is unlike anything he ever saw; it is so regular, everything boilt in the seed of the seed seen anywhere.

Leith is quite enchanting; it is, as Albert
eaid, 'fairy-like,' and what you would only imagine as a thing to dream of, or to see in a pieture. There was that beautiful large town, all of stone (no mingled colors of brick to mar it), with the bold Castle on one side, and the Caiton hill on the other with these like about hills of the colors. ther, with those high, sharp hills of Ar-hur's Seat and Salisbury Crags towering above all, and making the finest, boldest background imaginable. Albert said he felt sure the Acropolis could not be finer." The inhabitants of Perth also will often ereafter quote the opinion expressed by ler Mujesty and the Prince Concort of

heir city:

"We very soon came upon Perth, the dituation of which is quite lovely; it is on he Tay, with wooded hills skirting it entirely ou one side, and hills are seen again in the distance, the river winding again in the distance, the river winding beautifully.

A MURDER IN EFFINGHAM CO

ASHES—HE IS STERECTENTLY MUR ERL — PIND NG OF THE REMAINS OF IS BODY—ARRESTOF A NEGRO ON SUS CION.

We are indehted to a friend, conver-sant with the facts, for particulars of a deed startling and unprecedented as it is true. On Wednesday a bloody murder was discovered to have been committed in Ethingham county, the facts of which are not positively known, but enough is conjectured and circumstantially proved to show that it was one of the most brutal and fearful deeds on record.

As the tale is told, on the 2tth of last

As the tale is told, on the 24th of last manth, a white man, entirely nuknown and supposed to be a foreigner, went to the cabin of a negro, near the Augusta road, seventeen miles from the city, drew out the staple which held the padlock, and entered the place and stole half a peek of ground peas. He was caught by the owner of the cabin, who, in company with three others, attinued the man then with three others, stripped the man, then ned him to a tree, and with a whip gave nim seventy-five lashes upon his hare sack, and then turned the suffering victim

hellish vengeance. The spirit which could inflict a punishment so severe for so light an offence was not yet satisfied. The life of the man alone could gratify the bar-

barians, and compensate for the attempt to steal a few ground peas from them. Nothing was said about the matter un-til Wednesday last, when some negroes, til Wednesday last, when some negroes, who were prowling about a awamp, suddenly hadravealed to their gaze a sickening and fearful sight. There in the swamp, np to that time hid from mortal sight, lay the body of a white man—or rather the remains of the body. For, terrible as had been the fate of the poor unfortunate, the condition of the body was still more awful. Birds of ill omen, the bazzard and the carrion crow, had discovered it, and agtiated their filthy appear. still more awful. Birds of ill omen, the bnzzard and the carrion crow, had discovered it, and satisfied their filthy appetites upon the poor murdered remains of humanity. The flesh upon the head and part of the body was eaten away. The negroes gathered up what was left of the body and carried it out of the swamp, and gave notice of their discovery, and a coroner s jury was called to investigate the matter. There were two bullet wounds in the head—one in the back part, the in the head—one in the back part, the other in the side. When the negroes lifted the body np, the bullet in the back part of the head dropped ont.

The body was found about a mile from

where the whipping occurred. There was just enough of the lesh of the hack still attached to the extremities of the body for the marks to be seen that led to the belief that the remains were those of the man who had been whipped. There, on the flesh, were plainly and distinctly visi-ble the marks of the lash, the welts raised by the fierce blows struck by stalwart neoes. It is generally believed that it is e same person, and the natural concluhe same person, and the natural conclu-ion is that, after tormenting their victim, hese barbarous savages terminated his

The book, however, to be rightly appreciated, should be read as a whole, and we doubt not that it will deepen, it that be possible, the national sentiment of loyalty which the Queen has inspired, and increase the warmth with which every true heart among us says, God bless her.

Suffice to say that the Sonthwestern corner of New Mexico is our present scene of action, or rather of inaction. Garrison life is indeed a dull one, and much as officers and men are apt to receive with an oath the news of Indian depredations committed in the neighborhood and the conse quent order to prepare for a scout of three days to three weeks, still that style of excitement has a certain attraction as compared with the sameness of winter life in this region, so richly blessed with sand. cactuses, bare monutains, and savages. The papers in the States-this is the name which the civilized portion of the Union goes by in the Territorieswill tell you that the Indians are quiet, for they have signed treaties of peace, and would not, therefore, hurt a white man, unless they were themselves molested by the latter. Without, however, entering into an argument about this much discussed question, I would simply say that the people who have never witnessed the tricks and cruelty of those savages are unable to form a correct idea about their way of living and warfare. Here, at least, on the line of Arizona, and indeed all along the valley of the Rio Grande, the redskins have never been tamed, and nothing short of complete annihilation will ever clear this country of that great drawback to its progress of civilization. It is true, that at this time of the year their robberies are committed on a less extensive scalc: because their ponies are weak and hardly fit for duty for want of fresh grass; but still there is hardly a week passing without some reports or other reaching tribe, considered to be the bravest one i the far West, next to the Camanches. Of course we are laboring under still greater disadvantages in regard to food for our animals than

the Indians, and the latter go often unpunished, from our inability to follow them into the mountains with our large horses, which, any how, are nnfit in this wild country. In spring and summer, however, the noble red man has mor reason to dread the pale face, clad in blue and many a night has your correspondent spent in the saddle, on scouting expeditions, at the head of dctachments of well mounted and well armed men. In order to deceive the Indians about the number of his pursuers, it is necessary that only a single track should be visible, which affords at the same time the facility of more easily discovering and following the trail of the enemy. The cavalry, as well as the in fautry, therefore proceed in single file, which would certainly present a very lu dicrous appearance for parade at home. At a late skirmish, which a detachment of about thirty of our men had against a band of about a hundred savages, the former came out victorious, in as much as they remained masters of thelfield, and after a desperate resistance on the part of Indians, drove the savages back into the mountains. They did not, however, succeed in capturing the bodies of the dead and wounded savages for, whenever any of them fell, some athletic warrior would approach without heeding our bullets, and, as quick as a flash, swing his comrade on his pony and burry away. I will not undertake to describe the cruelty with which the Apaches treat their vanquished enemies, in the There are now one hundred and forty | first place, because the pen is unable to rander a correct nicture of the disholical manner iu which they torture their victims and make them die the slowest possible death, but also because I might be suspected of having a prejudice against the red race. I will merely state that a face to-face battle, such as almost every soldier of the late war has had plenty opportunity to witness, gives infinitely morsatisfaction than the conspicuousness of being surrounded by an invisible enemy, who is only watching his chance to attack you when you least expect it, and runs back to his hiding places as soon as he either finds himself outnumbered or has succeeded in his designs of murder and plunder. As for the country itself, there is indeed some very fine scenery, particularly in the more moun tainous part of the Territory, but there prevails a certain character of wildness and solitude which it is more pleasant to read about or witness as a transient traveler than to enjoy from one year's end to the other. Even the Valley of the Rio Grande, so much praised by many per sons, has, with the exception of a few

> little attraction for the admirer of real ro mantic scenery: and as for its much vaunted fertility, it is sufficient to say that secas, or ditches for the irrigation of the country, have to be used within a quarter of a mile from the river, and that the most ordinary vegetables-such as potatoes, tomatoes, etc. - are almost a delicacy, except on the line of Texas and Old Mexico; nor is the famous El Paso wine extensively cultivated at any distance north of the city whose name it bears. As for the inhabitants, they are on a very low grade of civilization; with the exception of the army, the Government officers, and a limited number of trades men, the population is composed of "greasers," a nick-name used by the Americans to designate Mexicans. The amount of knowledge which the majority of the natives possess is as far as the

To feed, clotbe, educate, and reform 50 boys in the House of Refuge, once for all we bope, it has cost the city of Louisville the small sum of 25 cents per day, or \$1 75 per week, or \$81 per year. Balance in favor of the House of Refuge, per boy, of 75 cents per day, or \$5 25 per week, or \$273 per year, or for the 50 boys, per year, \$13,650.

To manage and carry on a House of efuge as a business house is a matter, in ne sense, that is comparatively easy, but o to conduct and regulate its affairs that he inmates, after having been the subjects of its management, shall go forth as tree agents, without the watchful eye, the eareful help they have been receiving to do their part in society under any and all circumstances, is the test—is the difficulty. Yet this is the proper gauge with which we must test the success of our work. It would be of but little advantage to society if we could show to her only a good financial luviness house, a wall man. good financial business house, a well man-aged Refuge, boys faithful and obedient, earnest and diligent at work, neat aud tidy earnest and diligent at work, neat and tidy in their appearances, skilled and proficient in their studies, unless on trial, when from under our care, her money had been expended for making honest, bard-working, industrious, good, and reliable boys. Whereas, It hath pleased Almighty God, our Heavenly Father, to remove from our midst a citizen distinguished for his learning, talents, virtue and usefulness, it becomes us to leave upon record a memorial of an event so much to be deplored.

John H. Harney, the subject of this tribute, was born in Bourbon county, in this State, on the 20th day of February, 1800. He was a graduate of Miami University, Ohio, and subsequently filled the

MISCELLANEOUS, The new building, 75 by 30 feet, con taining warming room, work shop, and school room, is now completed, with the school room, is now completed, with the exception of benches, together with other arrangements necessary to carry on our work department. The usual festivities connected with Christmas were held in our new building. We now feel a great relief from the many incouveniences we were subjected to by the overcrowded state of things in the main building. The boys can now be protected from inclement weather during recreation hours, to which they have heretofore been exposed. We shall be enabled to carry on our work

in our infancy, having a great deal to learn which cannot be sought from philosophy, history, or ethics, but which must be acquired by actual passing through a train-ing which the teachings of a Refuge alone will give: in consideration of these things, I say we are not ashamed of our yearly record, either as a business house or a House of Reform. For as a business house, it is a money-saving institution to the city of Louisville and the Commonwealth of Kentucky. For to confine, to flog and cell, to bread and water a boy in we have seldom seen a more life-like portrait, or a more pleasing unison of surroundings. In the person of the subject there is a wondrously natural symmetry of form and feature, and the whole painting is "like a dream of poetry that may not be written or told—exceeding beautiful.

The portraits of Mr. and Mrs. Dix are from life. No one who ever saw the original to bread and water a boy in lear County Jail, costs the City and Commonwealth the sum of 75 cents per day, or \$5.25 per week, or \$273 per year. Add to this fuel, bedding, clothing, and a boy will cost, in the same ratio, not less than \$1 per day, or \$365 per year. Add to this the expense of repeated trials, and the yearly cost of a boy will be considerably increased. Now this would be a small amount, if, aftering the portraits of Mr. and Mrs. Dix are from life. No one who ever saw the original triangle of the subject there is a wondrously natural symmetry of form and feature, and the whole painting is "like a dream of poetry that may not be written or told—exceeding the poetro."

Mr. Frelingbuysen, on the supplementary reconstruction bill, said they had heard within the last year charges from the President and from political adversaries accusing the Republican party of departing the principles of the Constitution from the principles of the Constitution and acting at variance to the laws of the country; the question arose who was to determine the constitutionality of a bill; first Congress, then the President; then two-thirds of Congress if the bill be vetoed, and then the bill becomes a law, and the President has no right to send a message to Congress declaring such law passage to Congress neonetisticinal

d by Congress unconstitutional.

The Speaker maintained that the supreme power in land is the power that makes laws, and yet the President, we are told, contemplates resistance to this power—an act of temerity he should have trembled to think of. Let the Execuive of this country attempt to set up his will against the expressed will of Conwill against the expressed will of Congress and this country ceases to be a reublic and is nothing less than a despot-

Is it a wonder that we are obliged to keep np a large military force at the South, and that the country is borne down with deht and taxation, when a mass of men are there whose sedit ociations are encouraged by the Execu-ive of this nations. The Senator from Wisconsin predicted a war of races at the outh, and that the whites would crush but he wished to inform him that when that struggle, but he wished to inform him that when that struggle occurred, which he hoped in God never would, an army at the North would arise and assert the supremacy of the negro race. This proposition he denied, and contended that no other motive was intended than the establishment of med, and contended that no other motive was intended than the establishment of those great principles for which the fath-ers of the revolution fought—the triumph

Wholesale Abolition of Offices,

The President and the Anti-Contraction Bill.

New York, Jan. 25. The Tribune's special says: The action on Washbarne's bill in the House argues well for a sweeping retrenchment all

around.

The Committee on Appropriations will report the executive and legislative appropriation bill in a few days. The committee cut down the Secretary of the Navy's estimates twenty millions of dollars, and the estimates of Secretaries Seward, McCnlloch, and Browning, Attorney-General Stanbery, and Postmaster-General Randall will be decreased in the same proportion.

tandall will be decreased in the same proportion.

The committee have been making a thorongh examination of all the departments, and will recommend a large reduction of the clerical force employed in the departments and the abolishment of a number of offices which they deem necless and only an expense. These the committee will abolish by making no appropriations to continue them. A number of those now holding fat offices under the Government will be emprised when this bill is reported to find no provision made to pay their salaries.

The Secretary of the Treasury is opposed to Mr. Ingersoll's bill for the issue of notes.

The case of Elger against the United States, which has been before the courts for a long time, was finally disposed of tofor a long time, was finally disposed of to-day in favor of the government by the Su-preme Conrt affirming the jindgment of the court below. The suit involves the sum of half a million dollars, the proceeds of abandoned or captured property, and the decision sends the money into the treasury of the United States. It is generally believed by Mr. Johnson's friends that he will sign the anti-contrac-tion bill passed last week and now in his hands, but it is possible that he may con-

hands, but it is possible that he may con-clude to permit the bill to become a law by

A fatal disease had attacked the sheep on the island. It killed them in a few hours. The nature of the disease was unknown.

Proceedings of the Kansas Le-glstature.

The resolutions of the Kansas Legislature yesterday and laid over instructed their Senators and Representatives in Congress to vote against the bill to allow negro suffrage in the District of Columbia. The resolution says Kansas voted against negro suffrage last fall, and that Representatives from that State misrepresent their constituents in voting for the bill which passed Congress in December.

The Senate adopted resolutions asking Congress to grant subsidies to the Kansas branch of the Union Pacific railroad. In the House an amendment was offered to include all other railroads in the State for the same subsidies, and considerable feeling was manifested against the Pacific Company, in consequence of their refusal to pay taxes and submit to the law passed last winter, regulating fares, freignt, &c.

NATIONAL JUDICIARY EXPENSES.

From the last report of the Secretary of the Interior we get an idea of the cost to the country of the national judiciary machinery. There was paid to marshals of the United States for the year ending of the United States for the year ending June 30th, 1867, for defraying the expenses of the Courts of the United States, including fees of marshals, jurors, and witnesses, maintenance of prisoners, and contingencies of holding the Conrts, one million two bundred and three thousand two hundred and fonrteen dollars and seventy-foor cents. The amount paid to district attorneys, their assistants and substitutes for the same period, was one hundred and forty-six thousand nine hunhundred and forty-six thousand nine hundred and forty-five dollars and twenty-nine cents; to United States commission-ers, lifty thousand six hundred and fortythree dollars and aeventy-five cents; to clerks of the courts of the United States, seventy thousand eight hundred and nine-ty-five dollars and twenty-five cents, and for miseellaneous expenditures, one hundred and fifty-seven thousand eight hundred an

dred and thirty-seven dollars and sixty-seven cents. Of this sum, sixty-six thou-sand and ninety-two dollars and ninety-seven cents were paid for rent of build-ings for the accommodation of the courts and their officers.

On the whole the expenditures for this department of the Government may be considered low.

MORE FORTUNE-HUNTERS .- Another hunt More Fortuse-Husters.—Another hunt for fortune is announced. Still another English estate has American claimants. The Hedges family lately held a meeting at Wheeling, West Virginia, to devise measures for obtaining the property left by five brothers named Hedges near Oxford, England. It is said this estate consisted originally of \$7,000,000 in money and stocks, deposited in the Bank of England. This has been accumulating for many years, and now amounts to between many years, and now amounts to between \$20,000,000 and \$25,000,000.
